

Worksheet for the Timeless Tunic -Basic-

Measurements:

Translating Measurements to Fabric:

Length Formula: Length+2 inches:

Measure from end of fabric along length and mark.
Fold fabric at this mark, forming shoulder fold.
cut longer side of fabric to match length.

Sleeve Formula: $(\text{Bicep}/2) + 1\frac{1}{2}$ inches:

Measure from shoulder fold toward hem, and mark.

Body Formula: $(\text{Largest}/4) + 1\frac{1}{2}$ inches:

Measure from center fold toward selvedge, and mark.

Cutting the Fabric:

Using Sleeve and Body Formulas, sketch line E-F-G.

Cut through all 4 layers of fabric.

Keyhole Neck:

A to B = 4". Cut along shoulder fold through both layers of fabric.

A to C = 4". Sketch quarter circle between B and C and cut through top 2 layers only.

C to D = 4". Cut along center fold between top 2 layers only.

* When calculating formulas, always calculate the part inside parentheses () first. So, if you have $(2+2) \times 3$, you would have $2+2=4$, and $4 \times 3=12$.
